PACKAGE**

KAYDEESAYFA.CO.UK

HIGH QUALITY COMMERCIAL WINDOW BLIND SOLUTIONS

Window Blinds are an important feature in all new commercial builds and renovation projects.

Other than providing privacy and control over light, window blinds can also help buildings meet efficiency and environmental targets. Combined with the right fabric selection, blinds can help reduce solar gain and unwanted glare.

WINDOW BLIND SOLUTIONS

ROLLER BLINDS

SKYLIGHT BLINDS

VERTICAL BLINDS

VENETIAN BLINDS

BLACKOUT BLINDS

AUTOMATED BLINDS

ROLLER BLINDS

Easy to operate and durable. Roller blinds are a flexible solution suitable for many different applications, from offices to apartments and hospitals. Roller Blinds can be combined with a wide range of fabrics and come with manual, crank or electric operation.

SKYLIGHT BLINDS

Skylight blinds use a fabric tensioning system and guide wires to provide shading on horizontal or angled windows. Skylights blinds are commonly used in showrooms, offices and hotels. Skylight blinds are usually electrically operated but manual options are available.

VERTICAL BLINDS

Vertical blinds consist of a series of vertical fabric louvres or slats that can be rotated to allow the required amount of light in the room. Vertical Blinds give the user greater control over the light entering the room. Vertical Blinds can be combined with a range of fabric options.

VENETIAN BLINDS

Venetian blinds use horizontal slats that can be rotated to control the light entering the room. Venetian blinds are commonly made from wood, aluminium or plastic and are generally used in office and professional environments as they provide good light control and privacy.

BLACKOUT BLINDS

Blackout blinds are used commonly in high apartments or seminar / media rooms. Blackout blinds use side channels and a head box combined with a blackout fabric to block out light entering through the window.

AUTOMATED BLINDS

Modern buildings have become smarter with sophisticated BMS managing all aspect of the building. Blinds can be connected to BMS systems or even weather systems to automatically lower or raise based on temperature, sunlight or through a BMS system.

WHY KAYDEESAYFA?

With KaydeeSayfa you get the advantage of dealing with one company, one contract for multiple specialist construction packages.

You also get access to a proven supply chain that extends across the world. KaydeeSayfa have partnered with innovative and reliable suppliers over the past 35 years to bring our customers the quality solutions that meet their building requirements.

We have worked together with UK's leading contractors since 1985 - Our experience in project management and installation will ensure your project is completed to specification, on time and on budget. Over the years we have delivered over 3,000 projects - with our largest and most complex project worth over £2.2 million.
